VEERESH PATIL

7676813688 veereshvijay24082006@gmail.com LinkedIn GitHub Portfolio Bengaluru, India

PROFESSIONAL SUMMARY

Computer Science undergraduate at M. S. Ramaiah Institute of Technology (CGPA: 9.0/10), seeking a Java backend or software engineering internship. Hands-on experience building REST APIs with Java, Spring Boot, Spring Security, and JWT-based authorization, with a strong foundation in data structures and algorithms.

EDUCATION

M. S. Ramaiah Institute of Technology | Bengaluru 2024 - 2028
BE :Computer Science Engineering *CGPA : 9.0*
Class XII: 95.2% | Class X: 99% | JEE: 98Percentile

PROJECTS

BloodBridge (Save life) | Github Website
- Built and deployed a Spring Boot REST API with 37 endpoints for donor registration, screening, donation tracking, camp operations, and reporting.
- Implemented stateless JWT authentication and role-based authorization for admins and volunteers using Spring Security and BCrypt.
- Added donor status workflows and reporting APIs that aggregate donation data by blood group and medical partner.

Technologies / Tools Used : *Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, JWT, Docker, React, Maven*

Hostel Room Allotment System | Website Github
- Built a merit-based, multi-round room allocation system using CGPA ranking, preference fallback, and deterministic tie-breaking.
- Implemented room upgrades and peer-to-peer swaps using MySQL transactions and row-level locking to manage concurrent allocation changes.
- Developed JWT-based student and admin authentication with role-based access across 27 REST API endpoints.

Technologies / Tools Used : *Node.js, Express.js, MySQL, REST APIs, JWT, Git, GitHub, Vercel, Render*

TaskFlow (Made for team work) | Github
- Built and deployed an enterprise-grade Spring Boot REST API with 50 endpoints powering project lifecycle, sprint management, issue tracking, Kanban workflows, and team administration.
- Implemented stateless JWT authentication and granular role-based access control (RBAC) for Admin, Project Manager, and Developer roles using Spring Security and BCrypt.
- Engineered dynamic Kanban boards with state transitions, automated issue audit histories, multi-parameter search/filtering, and Redis caching for optimized data retrieval.

Technologies / Tools Used : *Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, Redis, Docker, React, JWT, Maven*

SKILLS

Programming :	Java, JavaScript, SQL
Backend :	Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT
Databases :	PostgreSQL, MySQL, MongoDB
Core Concepts :	Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Tools & Platforms :	GitHub, Postman, IntelliJ IDEA, Git
Spoken Languages :	English, Hindi, Kannada

LEADERSHIP & EXTRACURRICULAR EXPERIENCE

Leadership Experience — ACE Club
- Coordinated logistics, budgeting, and event operations for hackathons, quizzes, and other technical events.
- Worked with club members to plan and deliver events, coordinating resources and team responsibilities.

NSS member — Blood Donation Camps
- Collaborated with NSS volunteers to organize and support **blood donation camps**.
- Built **BloodBridge**, a blood donation camp management platform for NSS, to support donor registration, volunteer screening, and camp operations.
